

Convention on the Conservation of Migratory Species of Wild Animals

RESOLUTION 6.5*

INFORMATION MANAGEMENT PLAN AND NATIONAL REPORTING

Adopted by the Conference of the Parties at its Sixth Meeting (Cape Town, 10-16 November 1999)

Acknowledging the comprehensive work done to date by the Secretariat and the World Conservation Monitoring Centre in the preparation of the Information Management Plan (document UNEP/CMS/Conf 6.7 and Addendum);

Recognizing the need for an evaluation of implementation based, in part, on a synthesis of all previous national reports;

Noting the importance of harmonising reporting procedures across all biodiversity instruments, especially the Agreements and memorandum of understanding related to the Convention, thereby increasing collaboration between convention secretariats;

Acknowledging the need to ensure consistency and best practice in the compilation of national reports, containing the best available information and scientific knowledge;

Aware of the difficulties experienced by some Governments in the compilation and development of national reports;

Reminding Parties of the necessity of timely submission of their reports before the meetings of the Conference of the Parties, as outlined in Resolution 4.1 (Nairobi, 1994) to enable a thorough synthesis to be prepared;

Recognizing the opportunity to use national reports and the associated synthesis to promote the objectives of the Convention and its implementation at the local and national level, and to national and international governmental and non-governmental organisations;

*The Conference of the Parties to the
Convention on the Conservation of Migratory Species of Wild Animals*

1. *Recommends* that the format of national reports should be revised to include a standard minimum requirement of information such as a "tick box" proforma. Taking into account the Strategic Plan, it should cover national status of species listed under the Convention, legal and legislative structures, management activities, emerging issues, links with other conventions and any theme which the Conference of the Parties might ask Contracting Parties to report on;

2. *Instructs* the Secretariat to develop, in conjunction with the Scientific Council and Standing Committee, and circulate a revised reporting format to Contracting Parties to enable Parties to use the new format voluntarily for reporting to the seventh meeting of the Conference of the Parties;

* The original draft of this resolution, considered by the Conference of the Parties, was numbered 6.11.

3. *Urges* the Secretariat to identify, in cooperation with Parties, possible obstacles and/or constraints in preparing national reports;
4. *Recommends* that the Secretariat develop mechanisms to support countries in submitting their national reports, including assistance for developing countries to help gather the required information;
5. *Calls* upon the Parties to nominate focal points for correspondence, including national reporting, and to nominate contacts in other national authorities, as appropriate, for other issues; and
6. *Decides* that, to implement the Information Management Plan, the revised priority actions outlined in the Annex be carried out.

Annex - Implementation of CMS Information Management Plan

12 November 1999

Effective and efficient conservation action requires information on which to base planning and decision-making. The Information Management Plan addresses the requirement for CMS and related Agreements, and the needs for collaboration with other Convention Secretariats in the interest of harmonisation of information management and reporting.

Objectives:

1. Update information needs and initiate actions to ensure improved future access to information.
2. Develop information management tools to support the activities of the Convention and Agreement Secretariats
3. Increase access to information on migratory species already being collected by secretariats and Parties
4. Increase use of the WWW in delivering information services
5. Improve the Convention's regular review mechanisms
6. Develop mechanisms for sharing experience, in particular between Parties and other Range States

These objectives should be addressed in a manner that assures consistency and best practice in information management. This implies the use of standard formats and appropriate documentation of products and processes throughout.

Guide to time frame for and estimated costs of implementation:

VERY HIGH	to be completed by the end of 2000	2000	US\$ 40,000
HIGH	to be completed by the end of 2002	2001/2	US\$ 75,000
MEDIUM	to be completed by the end of 2004	2003/4	US\$ 65,000
LOW	to be completed by the end of 2005	2005	US\$ 75,000

1. Review Party reports together with information from other sources to develop an overview of the national and global implementation of the convention. Based on this review, develop revised guidelines and/or pro formas [Section 5.1; SP3.6]	5	Very High	Medium	Medium	Low	WCMC
2. Finalise the CMS Information Management Plan incorporating relevant information from the Strategic Plan, following advice from the Standing Committee and further consultation with the Convention and Agreement Secretariats [SP 5.3].	1	High	Low	Low	Ongoing (Good)	WCMC
3. Work with the Biodiversity Conservation Information System (BCIS) and others such as GROMS to develop a project on migratory species bringing together the information resources of these networks to address information needs of the Convention and its Agreements. [Section 4.7, Section 6.7, and Section 7; SP 8.4]	1	High	Medium	Low	Moderate	GROMS, BCIS Partners, (particularly BirdLife, WCMC, SSC and Wetlands International)
4. Build on existing efforts to establish an up-to-date, comprehensive and authoritative data-base of listed species and range states linked to other relevant species information (eg redlist data, CITES listings and information on concerted actions) and make it available on the web [Sections 4.3, 4.4 and 4.7; SP 1.6]	2	High	Medium	Medium	Limited	Experienced information management partner
5. Develop a CMS and Agreements projects database to help in monitoring the contribution being made by the Convention to ongoing work on migratory species, and as an aid to project management. [Sections 4.3, 4.4, 4.7 and 5.4; SP 1.6, 7.2]	2	High	Medium	Low	Moderate	Experienced information management partner

8. Implement a method for delivering information on migratory species and actions over the Internet, which includes the following: Party reports, a synthesis of past Party reports and project reports linked as appropriate to species and party lists. <i>[Sections 4.3, 4.4 and 4.5; SP 1.6]</i>	4	High	Low	Low	Good	Experienced Internet information service partner
9. Develop an information service on a group of high profile species in collaboration with partner organisations, to demonstrate the potential for co-ordinated web-based information services to support the Convention and Agreements. <i>[Sections 4.3, 4.5 and 4.7; SP 5.3]</i>	4	High	Low	Low	Moderate	WCMC, BirdLife, appropriate Parties
10. Develop a mechanism for the sharing of experience on a priority area and establish list servers or web forums for discussion and exchange of information on key areas of interest to implementation of the Convention and/or Agreements. <i>[Sections 4.6 and 7.4; SP 1.6]</i>	6	High	Medium	Low	Moderate	Agreement Parties and Secretariats
